RESEARCH

My research interests lie in Natural Language Processing and Machine Learning, with a focus on the learning and reasoning processes of language models. I am particularly interested in leveraging language models for practical applications for social good, such as developing user-side privacy tools to protect sensitive personal information online. My previous projects have explored the generalizability and robustness of NLP systems in diverse semantic spaces containing misinformation, language model representations of neologisms emerging over time, and probabilistic reasoning of LLMs for privacy risk estimation.

EDUCATION

Georgia Institute of Technology

Ph.D. in Machine Learning

Advisors: Prof. Wei Xu and Prof. Alan Ritter

GPA: 4.0 / 4.0

Atlanta, GA

Aug. 2023 – May 2028 (Expected)

Georgia Institute of Technology

Bachelor of Science in Computer Science

Specification: Intelligence-Theory

GPA: 4.0 / 4.0

GRE: 163 / 170 V, 169 / 170 Q, 5.5/6.0 W

Atlanta, GA

Aug. 2019 – May 2023

PUBLICATIONS

[1] Synthetic Worlds for Temporal Evaluation and Knowledge Updating in LLMs

Jonathan Zheng, Zirui Shao, Alan Ritter, Wei Xu

- NeurIPS 2026
- Links: [\[paper\]](#)

[2] Probabilistic Reasoning with LLMs for k-anonymity Estimation

Jonathan Zheng, Alan Ritter, Wei Xu

- NeurIPS 2025

The papers can be found on my webpage.

TEACHING

Large Language Models (CS 7652)

Graduate Teaching Assistant

August 2026 – Present
Georgia Institute of Technology

Large Language Models (CS 8803)

Graduate Teaching Assistant

January 2026 – May 2026
Georgia Institute of Technology

Natural Language Processing (CS 4650)

Graduate Teaching Assistant

January 2025 – May 2025
Georgia Institute of Technology

Introduction to Artificial Intelligence (CS 3600)

Undergraduate Teaching Assistant

August 2021 – December 2021
Georgia Institute of Technology

EXPERIENCE

Research Intern

Bloomberg L.P.

May 2026 – August 2026

New York, New York

- Conducted research in temporal drift and new knowledge evaluation on large language models. Explored continued pre-training, retrieval, and reasoning training methods to inject new knowledge in LLMs.

Software Engineering Intern

XPO Logistics

May 2021 – August 2021

Marietta, GA

- Built an LSTM and RNN deep neural network to forecast work orders for individual market hubs and companies
- Conducted ablation studies and feature engineering to improve forecast performance of deep learning models

Exchange Student

Bachelor of Science in Computer Science

Concentration: Artificial Intelligence

Sydney, Australia

Aug. 2022 – Dec. 2022

- Cultural Experience by doing an exchange program to the University of New South Wales in Sydney, Australia

PROJECTS

Financial Sentiment Analysis | *Python, Jupyter Notebook, TensorFlow, scikit-learn*

May 2020 – Aug. 2020

- Trained Natural Language Processing machine learning models to conduct financial sentiment analysis on the Financial PhraseBank dataset
- Built Logistic Regression, Convolutional, and Recurrent Neural Network models based on previous research

AWARDS

Academic: President's Undergraduate Research Award 2022
